

Organisation: Silverleaf Operations

Role: IT Intern

Time allowed: about 2 hours of work

Deadline: submit within **2 days** of receiving this email

What this is

We have a school **Operations system**. Your job is **not** to build a new system.

Your job is to:

- Get the project
 - Start it
 - Open it in a browser
 - Log in
 - Send proof that it worked
-

How to get the project

- Open: **<https://github.com/Nehemia-joh/qrcode>**
 - Click **Fork** (create your own copy), or click **Code → Download ZIP**
 - If you use Git:
-

```
git clone https://github.com/YOUR-USERNAME/qrcode.git
```

```
cd qrcode
```

What you need to do

- Open a terminal and go into the project folder.
- Start the system:

```
bash scripts/start-all.sh
```

If that fails, read any error message carefully and try again after fixing obvious issues (for example: ports already in use → run `bash scripts/stop-all.sh` first).

- Open **Operations** in your browser:

<http://localhost:8080/login>

- Log in with:

F i e l d	V a l u e
-----------------------	-----------------------

U s e r n a m e	a d m i n
P a s s w o r d	a d m i n 1 2 3

- Open **Bus QR** in your browser:

<http://localhost/school-bus-tracking/>

If that page does not open, try: **<http://localhost:8081/>**

- Log in with the **same** username and password:

F i e l d	V a l u e
U s e r n a m	a d m i n

e	
P a s s w o r d	a d m i n 1 2 3

- *(Optional)* In Operations, go to **Transport** and click **Open Bus QR**. Check whether it opens without asking you to log in again.
-

What to submit (reply by email)

Send **one email** with:

- Screenshot of the **Operations** page after login
- Screenshot of the **Bus QR** page after login
- A short note (5–10 lines) covering:

- the command(s) you used
- what worked
- what did not work (if anything)
- anything you found confusing

Deadline: within **2 days** of receiving this message.

If something does not work

Write down:

- the exact error message
- which step failed (clone / start / Operations login / Bus QR login)

Do **not** change the code unless you are asked to.

If you are stuck for more than 15–20 minutes, send a short question by email.

Important rules

- Use only the usernames and passwords in this brief.
 - Do not share these passwords outside this assessment.
 - Do not push secrets (.env files with real passwords) to GitHub.
 - Be honest about what worked and what did not.
-

Quick reference

Item	Value
Git Hu b	https://github.com/ Nehemia-joh/qrcode
Op era tio	http://localhost:8080/login
